PROJECTS

DevFlow-AI — Python, Streamlit, Groq API

2026

Built a GenAI-powered analytics assistant that converts natural language prompts into SQL queries and generates interactive data visualizations, enabling faster data exploration and business insights.

Urban Heat Island — Python, Pandas, scikit-learn, Folium

2026

Engineered a machine learning model for ward-level heat stress prediction in Bengaluru using climate and geospatial data, enabling hyperlocal climate-risk analysis through interactive Folium visualizations.

AI-Study-Assistant — Python

2025

Designed an AI-powered study assistant that generates simplified explanations, concise notes, and adaptive quiz questions from user-provided topics, enhancing personalized learning experiences.

IPL-Data-Analysis-Dashboard-Excel — Power BI, Excel

2025

Created an interactive Power BI dashboard to analyze IPL team performance, player statistics, and match trends using historical Kaggle datasets, enabling data-driven sports insights through dynamic visualizations.
